

AWMAC'S INDUSTRY MAGAZINE

WINTER 2024

www.awmac.com

The year 2024 has proven to be highly successful for AWMAC, marked by a renewed focus on our vision and a steadfast commitment to our members, partners, stakeholders, and staff. AWMAC continues to experience success and growth through the Guarantee and Inspection Service (GIS). Internally, we are evolving as an association, with ongoing efforts to standardize our membership across the country. The collaboration among all chapters has been productive, enhancing both our external and internal communications. As we advocate for the industry, AWMAC is poised for a prosperous future. We remain mindful of our history, as we seek to engage the next generation for our future.

The goal of AWMAC's Industry Magazine (AIM) is to inspire the architectural woodwork industry throughout Canada by showcasing the contributions of AWMAC's members and partners. As we conclude 2024, we present this edition, which serves as a pictorial reflection of the past year and the accomplishments within our chapters. Future editions will continue to feature the same high-quality content, along with engaging and informative articles that celebrate the diversity of this industry, spark new ideas, and foster connections.

Sensys for Glass Cabinets, Displays and Showcases THE ART OF THE POSSIBLE

Each part of the Sensys hinge is beautiful to look at, a jewel unto itself.

As a cabinet designer and maker, one needs creative license to envision what can be... to take sketches and bring them to life. To create something out of nothing is the art of the possible. And perhaps no material is more inspiring and challenging than glass.

For small spaces, glass brings in not only light, but openness, a sense of freedom, expanse and airiness. And this is where glass cabinetry is so remarkable. It allows displayed items to become a showcase – a focal point of beauty. Magical. Ethereal.

Sensys hinges by Hettich, a leading German company in furniture fixtures known for its exceptional quality and excellence in engineering, are ideal for glass applications. Part of the award-winning Sensys family of hinges, they are designed specifically for glass cabinets, showcases, and displays. All Sensys hinges feature the soft-close mechanism, and have a wide, automatically closing angle of 35 degrees, And the integrated Silent System ensures that delicate glass doors close gently and reliably, without disturbing the contents in cabinets, making it an ideal design choice for high-end retail showcases or luxury display units. Sensys hinges have shallow depths, ideal for sleek and thin glass fronts, giving designers more freedom in their final creation. With an elegant cover cap for both the arm and hinge, each part of Sensys is beautiful to look at, a jewel unto itself. With the slender adhesive surfaces, Sensys is guick and easy to install on any glass surface. The strong bonding system also lets one combine cabinet fronts and bodies in different materials, including wood. Temperature stable, from 5°C to 40°C, the Sensys hinge for glass is an elegant and reliable choice for cooler rooms, such as a wine cellar. Or used in a warmer setting, such as a bathroom for luxurious glass cabinets. Whatever the creation with glass - in the home, office, or retail setting - Sensys, the benchmark of hinges, delivers quality, flexibility, and design inspiration.

North American Architectural Woodwork Standards Manual

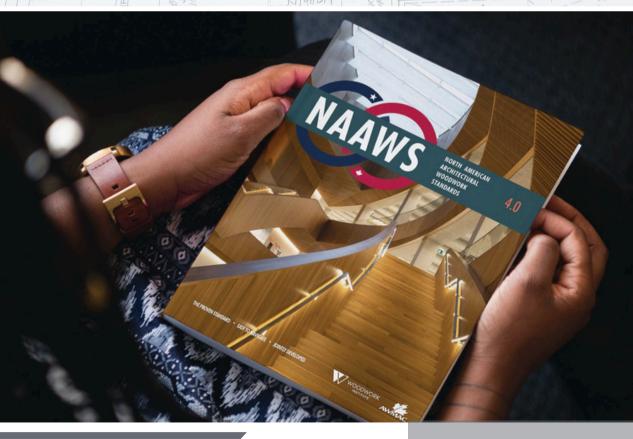

BUILD TRUST. BUILD QUALITY.

A comprehensive set of **standards** that defines **material and workmanship requirements** for the fabrication and installation of **architectural woodwork.**

For over **50 years**, AWMAC has proven to be the one **National voice** of the Architectural Woodwork Industry in **Canada.**

AWMAC's North American Architectural Woodwork **Standards (NAAWS)** is the proven industry standards manual that architects. specification writers, and millwork firms know and trust. All casework joinery methods listed within the NAAWS were tested and confirmed to meet or exceed the NAAWS performance requirements.

Confidential Pension Services Offices Arcadis Architects (Canada), G&P Millwork and DPI

The recent renovation of Confidential Pension Services Offices incorporated custom white oak millwork to enhance the space's functionality and design. By working closely together, **Arcadis, G&P Millwork**, and **DPI** successfully transformed the office using high-quality materials and custom craftsmanship. The result is an office that blends modern functionality with the warmth of natural materials, creating a welcoming space for employees.
