

GIS FORM SEPARATE CONTRACTS FOR SUPPLY AND INSTALLATION

Date:

General Contractor Company:

Project Manager:

Project:

Location:

The AWMAC Guarantee and Inspection Service program is intended to encompass the supply and installation of architectural woodwork. As the marketplace varies in contractual practices, non-contractually related companies may complete the supply and installation. The following information must be supplied to the owner to ensure the AWMAC Certificate of Guarantee covers both manufactured and installed aspects of architectural millwork.

Architectural Woodwork Contract(s) Details:

A. Supply Only Company:

B. Installation Company:

(if not contracted by the Supply Only company listed above)

There will be two separate Guarantee and Inspection Service programs, complete with Guarantees (for Manufacturer Members in Good Standing) or maintenance bonds (for non-members). The supply only contract will be subject to one set of GIS inspections and the installation contract will be subject to a second set of GIS inspections.

The normal contract break for supply and install contracts are FOB truck at worksite. Therefore, the supply portion should be inspected at the manufacturing plant. The installation would encompass site handling and installation.
